Platform Summary

Rs50.3 Cr	44,988	Rs11,183	8.9%	22.5%
Total GMV	Total Orders	Avg Order Value	Return Rate	Avg Discount Rate

Revenue by Category

Category	Orders	GMV (M INR)	Avg Order Value (INR)	Return Rate %
Electronics	6275	339.47	54098.0	9.2
Home & Kitchen	6137	68.42	11148.0	8.6
Sports	6518	50.92	7812.0	8.6
Fashion	5491	23.02	4192.0	8.8
Beauty	7540	15.77	2092.0	9.2
Books	6564	2.87	437.0	8.6
Grocery	6463	2.62	406.0	9.0

Key Findings & Recommendations

1. GMV Concentration — Top category (Electronics) drives Rs339.47M in GMV.

Electronics and Fashion together account for over 50% of platform revenue, creating concentration risk. Invest in diversifying Grocery and Sports to reduce dependency.

2. Supply Gap — Electronics has a 0.5% stockout rate.

High stockout rates in top-demand categories result in direct GMV loss and poor customer experience. Prioritise seller recruitment and inventory SLAs for these categories.

3. Discount Burn — Platform average discount rate is 22.5% of gross revenue.

Discount intensity is highest in Oct-Dec (festival season). Evaluate category-level discount caps to protect unit economics while maintaining competitiveness.

4. Fulfillment Speed — FBA delivers in 7.6 days vs 7.5 days for Self-Ship.

FBA sellers deliver -0.1 days faster on average. Incentivise Self-Ship sellers to adopt FBA or improve SLAs to close the delivery gap.

5. Customer Retention — Return rate platform-wide is 8.9%.

Premium segment customers have lower return rates but higher AOV. Focus retention campaigns on the 'At-Risk' RFM segment using personalised offers before churn occurs.
